“The most important words in the world are ‘Let go.’”

MARISA PEER
Welcome to RTT™,
I am immensely proud of this extraordinary therapy method that took me 30 years to develop. I am delighted at the success my graduates are having in creating a wonderful career for themselves through RTT™. I hope you find the same success and fulfillment.

An Introduction to Rapid Transformational Therapy™ (RTT™)

Rapid Transformational Therapy™ (RTT™) is the culmination of Marisa’s life work. Having brought about rapid and permanent change in her client list of Hollywood celebrities, CEOs, royalty and sports stars, Marisa developed her foundational method of RTT™ based on a deep analysis of her most troubling cases and stunning turnarounds. After countless requests from other therapists, she finally agreed to teach people all about RTT™. In doing so, she shared an archive rich with case studies of amazing client successes.

Marisa Peer developed Rapid Transformational Therapy™ over a 30 year period, whilst working with clients from diverse backgrounds, presenting with a wide variety of issues. RTT™ quickly became her go-to approach, as it effectively provides the transformation that clients long for, but that other therapists often find difficult to deliver. Clients see RTT™ as a worthy investment as they get exactly what they want - freedom from the painful problems of their past.
What is Rapid Transformational Therapy™?
Rapid Transformational Therapy™ is an amazing cutting-edge therapy, created by top therapist, Marisa Peer.

RTT™ is a hybrid, stand-alone therapy combining many well-regarded approaches of modern psychology, psychotherapy, hypnotherapy, healing, counselling and coaching. It has been said that Marisa’s true talent is making what seems complex - simple and accessible.

RTT™ is made up of a number of unique techniques, developed by Marisa, based on evidence of what works with real clients in real sessions. RTT™ has proven to deliver outstanding results, often in just one to three sessions. It works because rather than treating clients’ presenting symptoms, RTT™ extracts the root cause of every client’s issues. Marisa teaches that we are not born with negative beliefs and habits, we acquire them. RTT™ explores those beliefs and helps clients understand and reframe them. RTT™ enables clients to think differently about their future.
What it means to be an RTT™ therapist

RTT™ training provides you with a powerful set of skills, so you can make a profound difference in your clients’ lives and your own.

As a qualified RTT™ therapist, you will have the confidence, the skills and the ability to transform any client, with almost any issue.

Although relatively new, Rapid Transformational Therapy™ is already making waves as a practical, revolutionary and life-changing therapy. RTT™ is known for getting fast results with even the most complex issues. You will be taught revolutionary methods that allow you to eliminate negative beliefs and habits and install positive behaviors in clients.

RTT™ goes deeper and gets results faster, which gives you immense career satisfaction and fulfillment, as clients’ issues are resolved more quickly than using traditional approaches. This level of learning gives you the confidence you need to succeed.

Once you qualify in RTT™, you will also learn powerful marketing techniques and strategies, including how to find your niche or specialist area. You may decide to apply yourself to a particular area, including but not limited to: Weight Issues, Compulsive Behavior, Insomnia, Confidence, Self-Esteem, Goal Achieving, Fears, Phobias and Addictions, Anxiety, Depression, Skin Conditions, PTSD, Infertility and Birth, Children’s Problems, Unhappy Teens, Exam Nerves, Public Speaking, and Sporting Performance.

Studying RTT™

The unique power of RTT™ is that Marisa has made the seemingly complex study of the mind, simple to understand. The program is underpinned by a range of theoretical approaches, but unlike other training, the focus is hands-on, practical and experiential learning. As Marisa says “you don't learn to swim by reading a book.”

Your qualification enables you to work with both individuals and groups, dealing with a broad range of issues and conditions: anxiety, depression, addictions, and physical health problems. As part of the program you will receive a handbook providing detailed guidance on each technique and everything you need to set your clients up for success. You will also have 24/7 access to footage of real-life sessions, analysis and a number of ready-made scripts.

You can use RTT™ to run workshops to promote your business and attract clients. You will learn how to present to groups on issues such as weight loss, stopping smoking, public speaking, or hypnobirthing. Some of our therapists choose to specialise in working with children and young teens, increasing their self-esteem and confidence at schools and in sports.

Whatever you choose, when you train in RTT™ you are given outstanding support, including your own private facebook group and webinars each month in marketing and RTT™ specialist subjects.

“If you are concerned that you might lack experience, let me put your mind at rest.”

Many of our successful therapists had no prior therapy training at all, just a passion to help others. Doctors, nurses, personal trainers, coaches, beauticians, city workers, teachers, marketers, policemen, small business owners, single parents, career changers and retirees quickly learned to apply the tools, with confidence, and are now generating their own success, with a growing client base.
RTT™ uses safe, proven and powerful techniques

RTT™ utilizes hypnosis which is used to assist countless clinical and medical conditions.

This is just a partial list of documented areas in which hypnosis has been used successfully: Agoraphobia, Addictions, Allergies, Anxiety and Stress, Asthma, Autoimmune Disorders, Bedwetting, Blushing, Skin Conditions (Eczema, Dermatitis, Acne, Neurodermatitis Psoriasis) Migraines, Depression, Exam Stress, Fears and Phobias, Fear of Flying, Insomnia, Irritable Bowel Syndrome, Nail Biting, Memory and Concentration, Public Speaking, Post Traumatic Stress, Passing your Driving Test, Sexual problems, Smoking, Stuttering, Sporting Ability, Weight control.

New areas for the successful use of RTT™ are constantly emerging. Recent examples are: assistance in IVF treatment, hypnobirthing, hypnolearning, immune system support, the treatment of burns, IBS, coaching and money management, to name just a few. RTT™ is being used in the medical profession, in schools, with business leaders and even Olympic athletes.

“I’m so thrilled with the RTT™ method. I have such confidence with this. I’ve done around nine sessions already. I’m getting great feedback, happy clients and I love it!”
